**Name_____ No calculators. Present neatly. Score____.**

1)

Find the shortest distance from a fixed point $(x_1, y_1)$ to the straight line $Ax + By = C$.

2)

Use limits to find the area that graph of $f(x) = x^2 + 2x + 3$ forms with the horizontal axis on the interval [-1, 3]. (Show all the work leading to your answer.)

Your work:
